

BLANK RECORDABLE CARD

Recording Business Blank Recordable Card allows you to create the most thoughtful greeting card possible. We appreciate your business and look forward to you creating a sentimental and memorable card for your loved one or special receiver.

Your recording will automatically play as the receiver opens the card. You can customize this card fully, from the design and writing inside to the audio message recording. You are making this card with thought and intention.

The card records up to 30 seconds. You can record a voice message, music, etc.

The card is easy to understand and customize. We recommend starting by designing the card then recording audio, but you can customize the card in any order.

Each card can record & play up to 50-60 times.

CUSTOMIZE YOUR DESIGN

Start off by designing your card. You can use a pen, pencil, marker, colored pencil, crayon, etc. to visually customize the design to your liking. You can draw, write a message inside, or even glue cutouts to the card. Be creative! If you want, use all the white space on the front, insides, and back. It's not our card anymore, it's your card now, and after you customize it, it'll be your receiver's card.

CUSTOMIZE YOUR RECORDING

The next step is recording. Let's get your audio on the card! Inside the card, there is a red "REC" button. You can record any audio, record your voice, music, etc. Instructions on how to record are on the back of this card. When you are done recording your message, it's time to test! Close the card and open it again to hear your recorded audio. The card can record and play up to 50-60 times.

(Instructions continued on back)

HOW TO RECORD ON CARD

These simple instructions will teach you how to record on to the card.

1. Open and lay the card flat.
2. Press and hold the red "REC" button on the right inside of the card near the corner until you hear one (1) beep - "beep."
3. After you hear one (1) beep, start your customized audio recording for up to thirty (30) seconds. It has begun recording... When you let go of the red "REC" button or when the thirty (30) seconds are done, you will hear two (2) beeps - "beep beep."
4. Release the red "REC" button when done recording.
5. Close and open the card to hear your recording.

To re-record, just repeat the process above.

Each card can record & play up to 50-60 times.

After you're satisfied with the recording on the card, we recommend removing the red "REC" sticker so your loved one or special receiver doesn't accidentally erase it. You can also make them aware of this.

The card will be made with intention by YOU.

We appreciate your purchase of this card. Enjoy!
